MEMORANDUM FOR: The Director

SUBJECT : [] Report

1. The Senior Executives Group has completed their action on the [] report. I have in preparation for your information a detailed status report of where we stand. I had hoped to submit such a report by the end of this week. However because I am not sure that some of the actions I think are being taken are in fact being taken, I am having [] check out the details before making my report to you which I hope will be ready very soon.

2. In general, all of the recommendations of the [] report which were considered valid and practicable were approved for implementation by my SEG. In some instances the procedural and organizational corrections are different from those recommended in the report. In at least two instances the recommendations of the report and the argumentation in support thereof prove to be based upon misinformation. We are taking the view that these recommendations simply be disregarded.

3. The above is solely for the purpose of advising you that the project has not been forgotten and is not being neglected.
